# Adlnsure Underwriting Workbench can easily be integrated with existing systems of the insurance company

- Client and Partner management
- Rating engine
- Document creation
- Reinsurance and coinsurance

New opportunities can be recorded automatically from the input document system, such as OCR, CRM, and portals.

Underwritten policies can be transferred to the core policy management system via ESB, direct REST API/SOAP/XML calls, file import/export, etc.

## AdInsure enhances Underwriting Efficiency and Performance with Collaborative and Automated Solutions

## **Enhanced Services and Clarity**

AdInsure workbench centralizes operations and data transparency, resulting in streamlined client service.

## **Optimized Case Assignment**

AdInsure meticulously directs tasks to the appropriate team member or department, ensuring refined case management and accountability.

### **Improved Collaboration and Transparency**

AdInsure ensures a smooth transition of tasks across teams, and easy progress monitoring offering transparency across the whole UW process.

## **Integrated System Efficiency**

AdInsure consolidates platforms and communication pathways, eradicates the need for redundant data entry across systems minimizing errors..

## **Enhanced productivity through automation**

AdInsure removes the need for many manual activities through rule-based automation of the UW workflow, data input, and more.

## About Adacta

Adacta is one of the leading software vendors for the insurance industry. Established in 1989, we spent decades helping insurance organizations to grow their digital capabilities and drive new profits.

Our mission is simple: empower tomorrow's industry leaders to reach their potential through technology.
