

# Design and orchestrate Ecosystems with a modern Marketplace Platform

# Agenda

- 01 Addressing Market Needs
- 02 What is the EIM platform?
- 03 Features for ecosystems consumers
- 04 Features for ecosystem partners
- 05 Features for insurers and ecosystem builders
- 06 Architecture and technological slack

## 01 Market needs

# Addressing the emerging ecosystems

In the fast-paced insurance world, traditional models are rapidly giving way to innovation and collaboration. Ecosystems present a unique opportunity for market disruption.

# Emerging market opportunity: digital ecosystems

- Digital ecosystems are projected to earn **\$60 trillion by 2025, accounting for over 30% of global corporate revenue** ([McKinsey](#))
- The strength of ecosystems lies in their capability to harness each participant's unique strengths while focusing on improving the value for the customer
- Insurers can either join existing ecosystems or create their own to ensure that they are the disruptors, not the disrupted.
- Top motivating factors for insurers include customer retention through value-added services, acquiring new customers over novel sales channels, fostering innovation by accessing fresh ideas, and more.

In the future, the existing Insurance value chain elements will be split across consumer ecosystems.

# Exploring insurers' choices: building or joining consumer ecosystems

## 1. Participation in "other peoples" ecosystems:

- The rise of APIs enabled insurers an easy distribution of insurance products across channels and participation across emerging ecosystems.
- Adacta calls this level of innovation "from the inside out" and supports insurers with functionalities such as **out-of-the-box API generation** embedded into the insurance core platform AdInsure.

## 2. Active ecosystem building:

- Insurers can create their own ecosystems for increased innovation and control.
- To address the need, Adacta developed the Adacta EIM platform.

## 02 EIM Platform

# The technology building block of future ecosystems

Insurance companies can leverage EIM for creating and orchestrating their own ecosystems, thereby becoming the disruptors rather than the disrupted.

# Ecosystem and Insurance Marketplace platform

It supports Insurers and Brokers to:

- **Build consumer ecosystem**

Provide the platform and marketplace that connects vendors' services, goods, and users.

- **Engage consumers outside of insurance**

Increase engagement outside the infrequent insurance interactions and offer a complete set of services.

- **Offer insurance value chain services and products to wider ecosystems**

Participate in the cross-industry economy of the future

# Supported ecosystems

**INSURANCE  
SERVICES**

## **MOBILITY**

KASKO, MTPL  
Travel

## **HEALTH**

Medical, check-up

## **HOUSING**

Flat, house

**ECOSYSTEM  
SERVICES**

Repair shop interaction  
Road Assistance  
Auto-lawyers help  
Towing, tire changes

Clinic & doctor discovery and  
scheduling assistance  
Chat, audio- & video-  
telemedicine

Plumbers and small repairs  
Housekeeping  
Moving services

## 03 CONSUMER FEATURES

# Features for ecosystem consumers

All the services and goods, related to a specific consumer ecosystem.

# Full set of services

- Native mobile Apps and portals for Marketplace (Insurance products, Partner products, and services) access
- Management of personal data and preferences
- Owned and insured object management
- Risk, Health, and investment coverage purchase
- Policy/Contract management
- Services management: provider selection, scheduling of appointments, communication
- Purchase and payment of ecosystem services

**Profile**

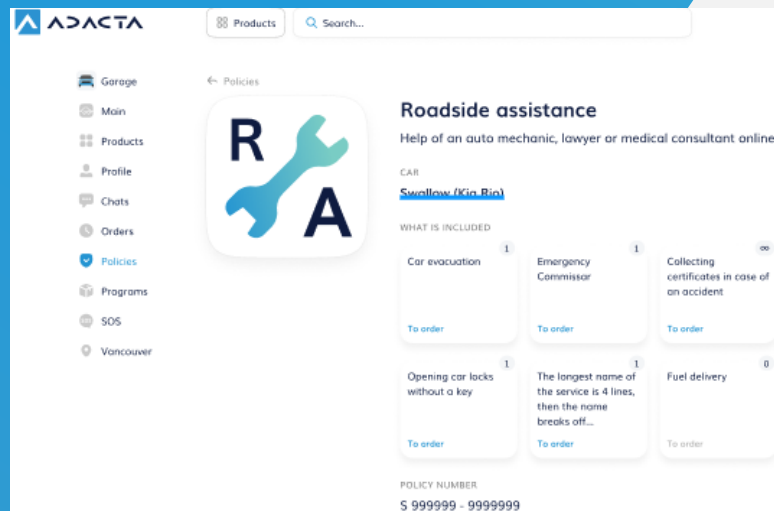

**Marija Djuricic**

Full name	Date of birth
Marija Djuricic	24.05.1995
Sex	Passport series and number
Female	JMBG 234678268
Phone number	Additional phone number
+386 8999 999-99-99	No data available
Email address	
mari@gmail.com	

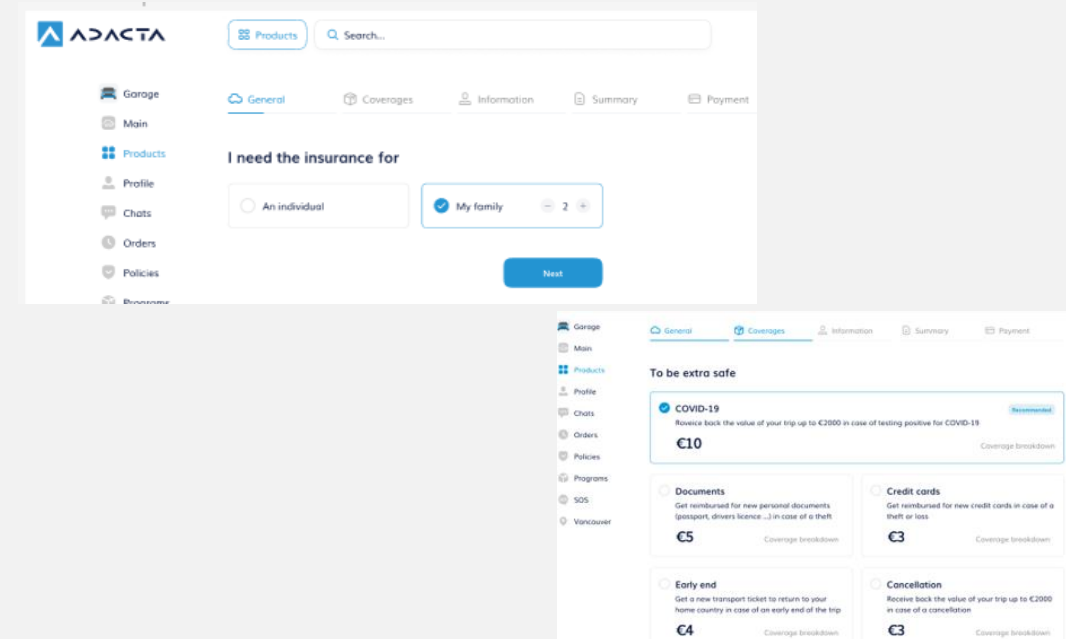

# Claims handling

- Claims **reporting and intake** via Coverage-specific workflows; instant transfer of data and documentation to the insurance companies and/or claim handlers
- Related **3rd party services**, e.g. roadside assistance and repair
- **Two-way communication** with the consumer

# Insurance products

- **Purchase** of insurance products for Health, Life, and Non-life business lines
- **Overview** of all policies across all insurance partners
- Policy **renewals**
- Simple annexes: change of coverage, change of sum insured
- Bill presentation and payment

# Purchase of additional services

- **Upsell** service outside of the insurance coverage
- Service **scheduling**
- Line-specific and user-oriented list of propositions
- **Communication** with service providers via chats and audio/video

### Organization of repairs

Assistance in organizing car repairs, search for service stations, organization of auto consultations online

**COST**  
The exact cost is formed after answering several clarifying questions.

[Arrange](#)

**MORE ABOUT THE SERVICE**  
Rational organization of car repair allows you to determine the required amount of work at the service station, quickly start performing repairs

**DURATION OF EXECUTION**  
30-60 minutes

**ADVANTAGES OF THE SERVICE**

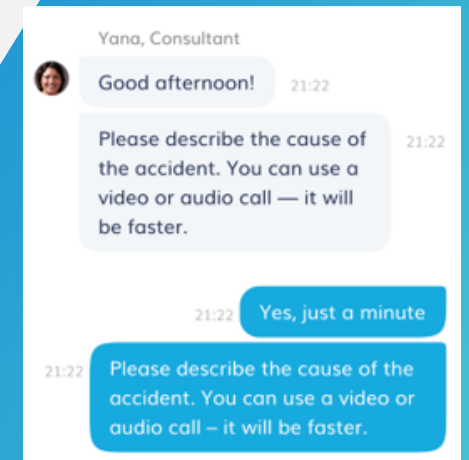

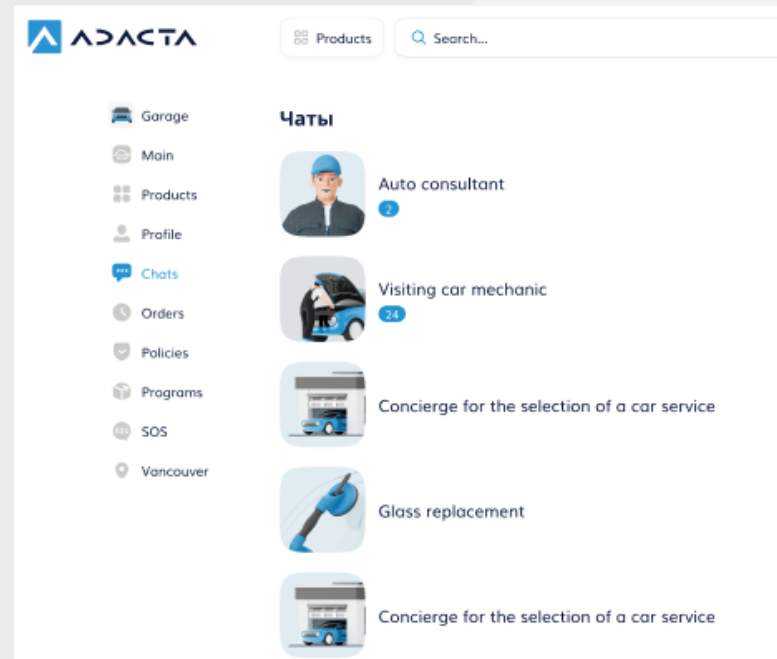

- ① 10 thousand craftsmen are ready to work
- ② All works are insured

**TERMS AND CONDITIONS**  
6 months after purchase

# Chat and audio/video calls

- Audio/video chat with specialists, consultations, telemedicine
- Text chatting with all product and service providers, attachment-document exchange
- Widgets could be included and proposed on-the-go on the go conversation for extra services or payments

## 04 PARTNER FEATURES

# Features for ecosystem partners

A marketplace to extend their business reach.

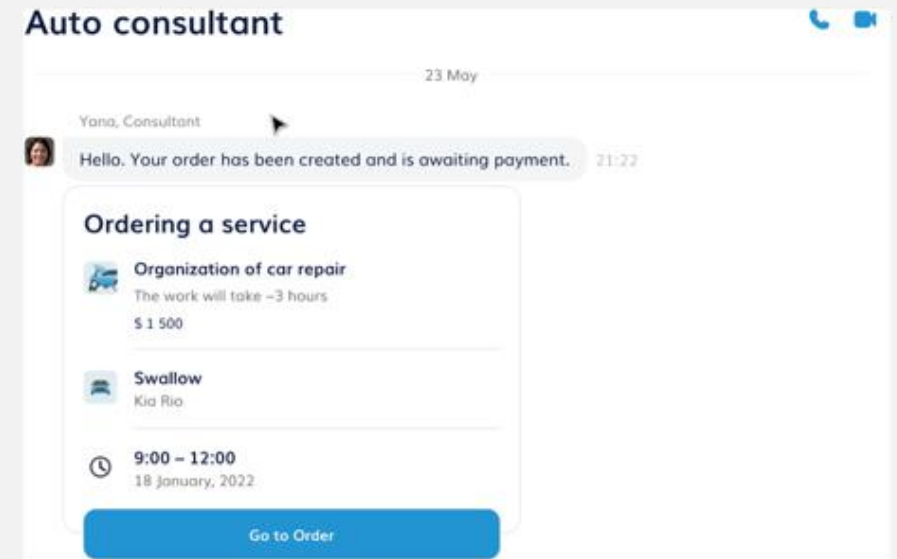

# Marketplace access

- Ecosystem partners get **access** to an industry-specific ecosystem
- Partners get access to communication and scheduling tools
- Partners pay **commission**

# Partner features

- **Service management:** registration and definition of services
- **Scheduler:** working schedule, lists of available specialists
- **Billing and Commission**
- **Communication-Service conducting:** if service could be provided via chat and/or call, such functionality is available to dedicated employees and could be also integrated with any 3rd party solutions

# Access to new insurance coverages

- Immediate access to new insurance coverages as they are released
- Strong up-sales potential
- Embedded insurance

# Partner features

- Agent portal
- Built-in **AI/ML-based recommender system** recommends insurance products to direct and agent channels
- Billing and Commission

The screenshot shows the AdInsure agent portal interface. The top navigation bar includes 'AdInsure' and 'Hi, Administrator'. The main content area is titled 'PERSPEKTIVA QUOTE' and is divided into several sections: 'QUESTIONNAIRE', 'POLICYHOLDER', 'INSURED', 'TERMS', 'INDEXATION', 'BENEFICIARIES', 'CONDITIONS & CLAUSES', 'PAYMENT PLAN', and 'SURRENDER'. The 'NEED' section contains several questions with dropdown menus for 'Yes' or 'No' answers. The 'REQUEST' section is for 'Life insurance in the event of death'. A video call window is visible in the bottom right corner.

The screenshot shows the AdInsure agent portal dashboard. The top navigation bar includes 'AdInsure' and 'Hi, Charles Hyde'. The main content area is titled 'My new dashboard' and features a 'Product recommendations' section. Below this is a table of 'Policy holders with recommendations'.

NAME	POLICYHOLDER CODE	FIRST RECOMMENDED ITEM	FIRST RECOMMENDATION SCORE (0 - 10)	SECOND RECOMMENDED ITEM	SECOND RECOMMENDATION SCORE (0 - 10)
James Novak	LE-00012	RollingBlackall	10.00	Cisco	9.00
Neil Stark	NP-00006	Travel	9.84	Motor	9.11
Hugh Drysdale	NP-00009	Travel	9.84	Motor	9.11
AIR TERMINAL HANDLING S.A.	LE-00044	RollingBlackall	4.00	CISCO	4.00
John Smith	NP-00007	Travel	9.97	Motor	9.15

## 05 BUILDERS FEATURES

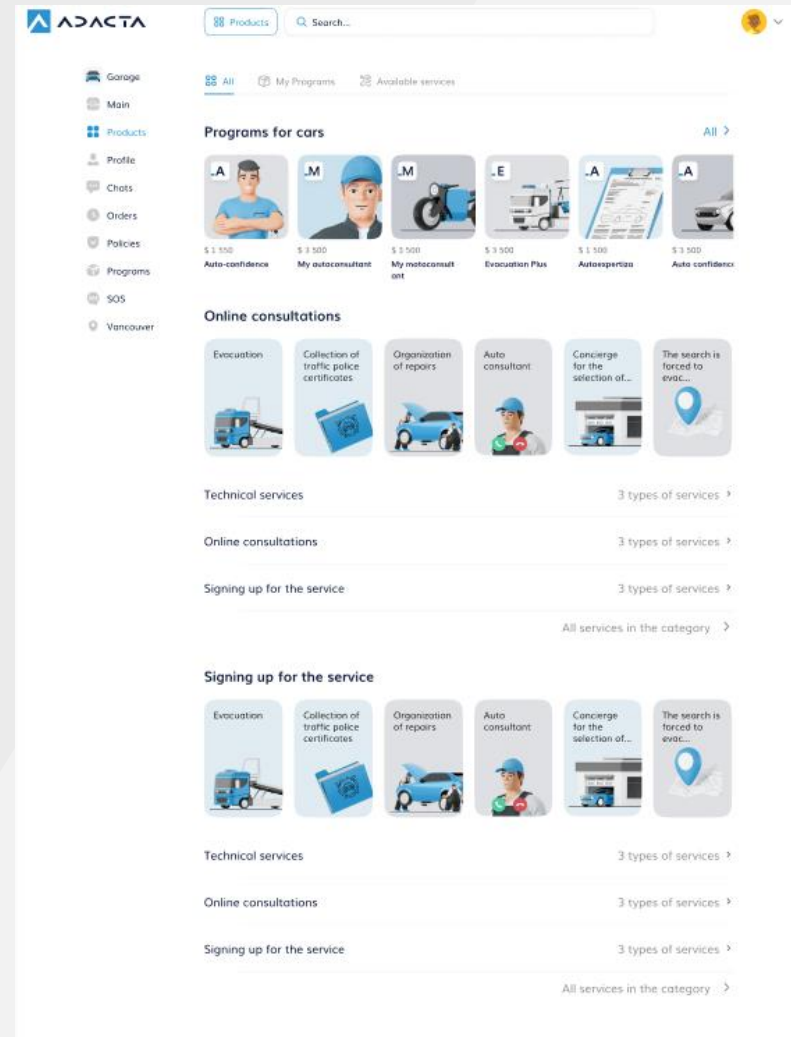

# Features for insurers and ecosystem builders

Insurers can leverage a modern platform to orchestrate channels and manage insurance products, customer profiles and projects easily

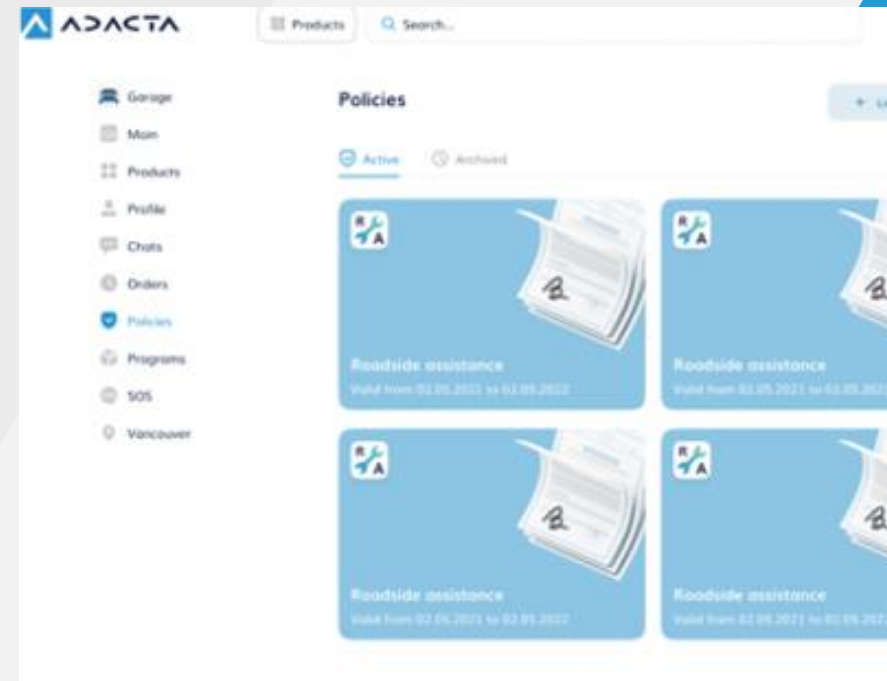

# Overview

- Platform is delivered as a white-label solution to be adjusted based on design guides.
- UI is provided by modern web browsers and native Android and iOS native apps.
- Includes a modern integration framework for services partner and other integrations.

# Insurance products

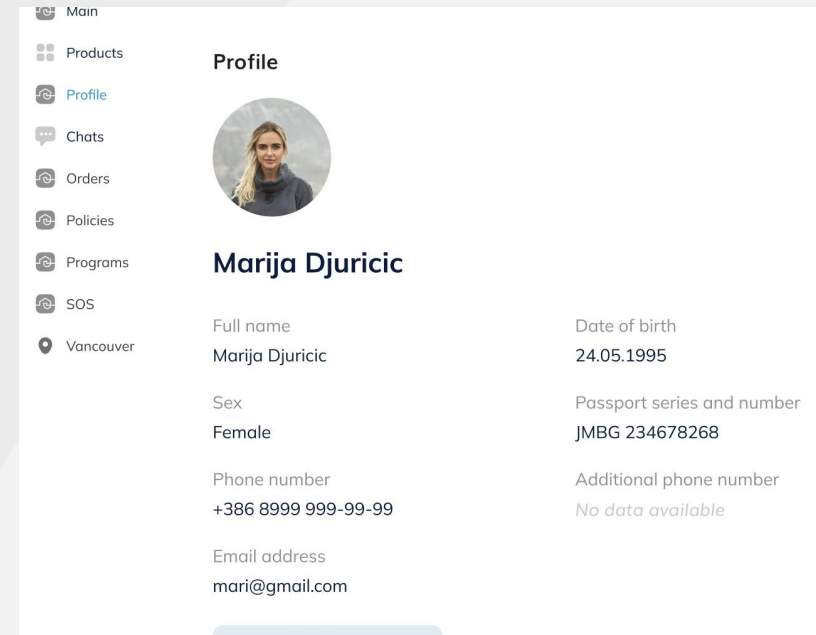

- Option to integrate Insurer's Core back-end systems via a modern integration platform
- Overview of all policies across all insurance partners
- Policy management: renewals, simple annexes
- Bill presentation and payment

# Customer profile management

- Apps and portals for marketplace access
- Profile management: registrations, changes, preferences
- Customer data can be enriched with 3rd party solutions
- History of purchases
- Communication with consumers
- Easy integration with own CRM and campaign management systems

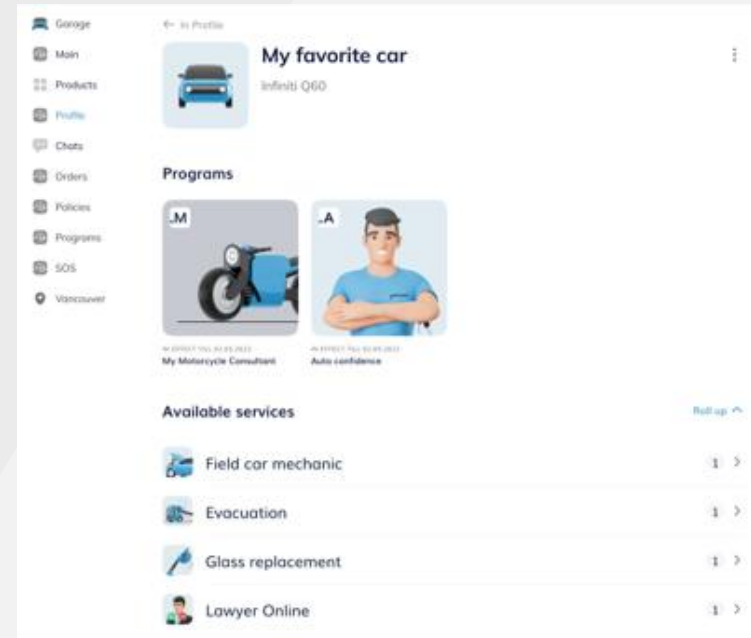

The screenshot displays a user interface for customer profile management. On the left is a vertical sidebar menu with icons and labels for: Main, Products, Profile (highlighted in blue), Chats, Orders, Policies, Programs, SOS, and Vancouver. The main content area shows a profile card for 'Marija Djuric'. At the top of the card is a circular profile picture. Below the name, the card is organized into two columns of information:

Full name	Date of birth
Marija Djuric	24.05.1995
Sex	Passport series and number
Female	JMBG 234678268
Phone number	Additional phone number
+386 8999 999-99-99	No data available
Email address	
mari@gmail.com	

# Insured/owned projects

- Easy integration with own CRM and campaign management systems
- Business-line-specific lists of the objects with configurable sets of UI and data
- Object-oriented flows could propose new services for each object and allow quick access to any details or attachments
- Sample objects:
  - Cars
  - Family members
  - Flats & Houses
  - Pets
  - Trips

# Online payments

- Ability to easily integrate with any acquiring provider or service
- In-app payments for any new scheduled or already provided service, new product or scheduled premium payments for the insurance policies
- Comprehensive support of discounts, marketing programs or promo-codes

**Payment**

**Credit Card** 

Name on card  Expiry

Card number   CVV

**PayPal** 

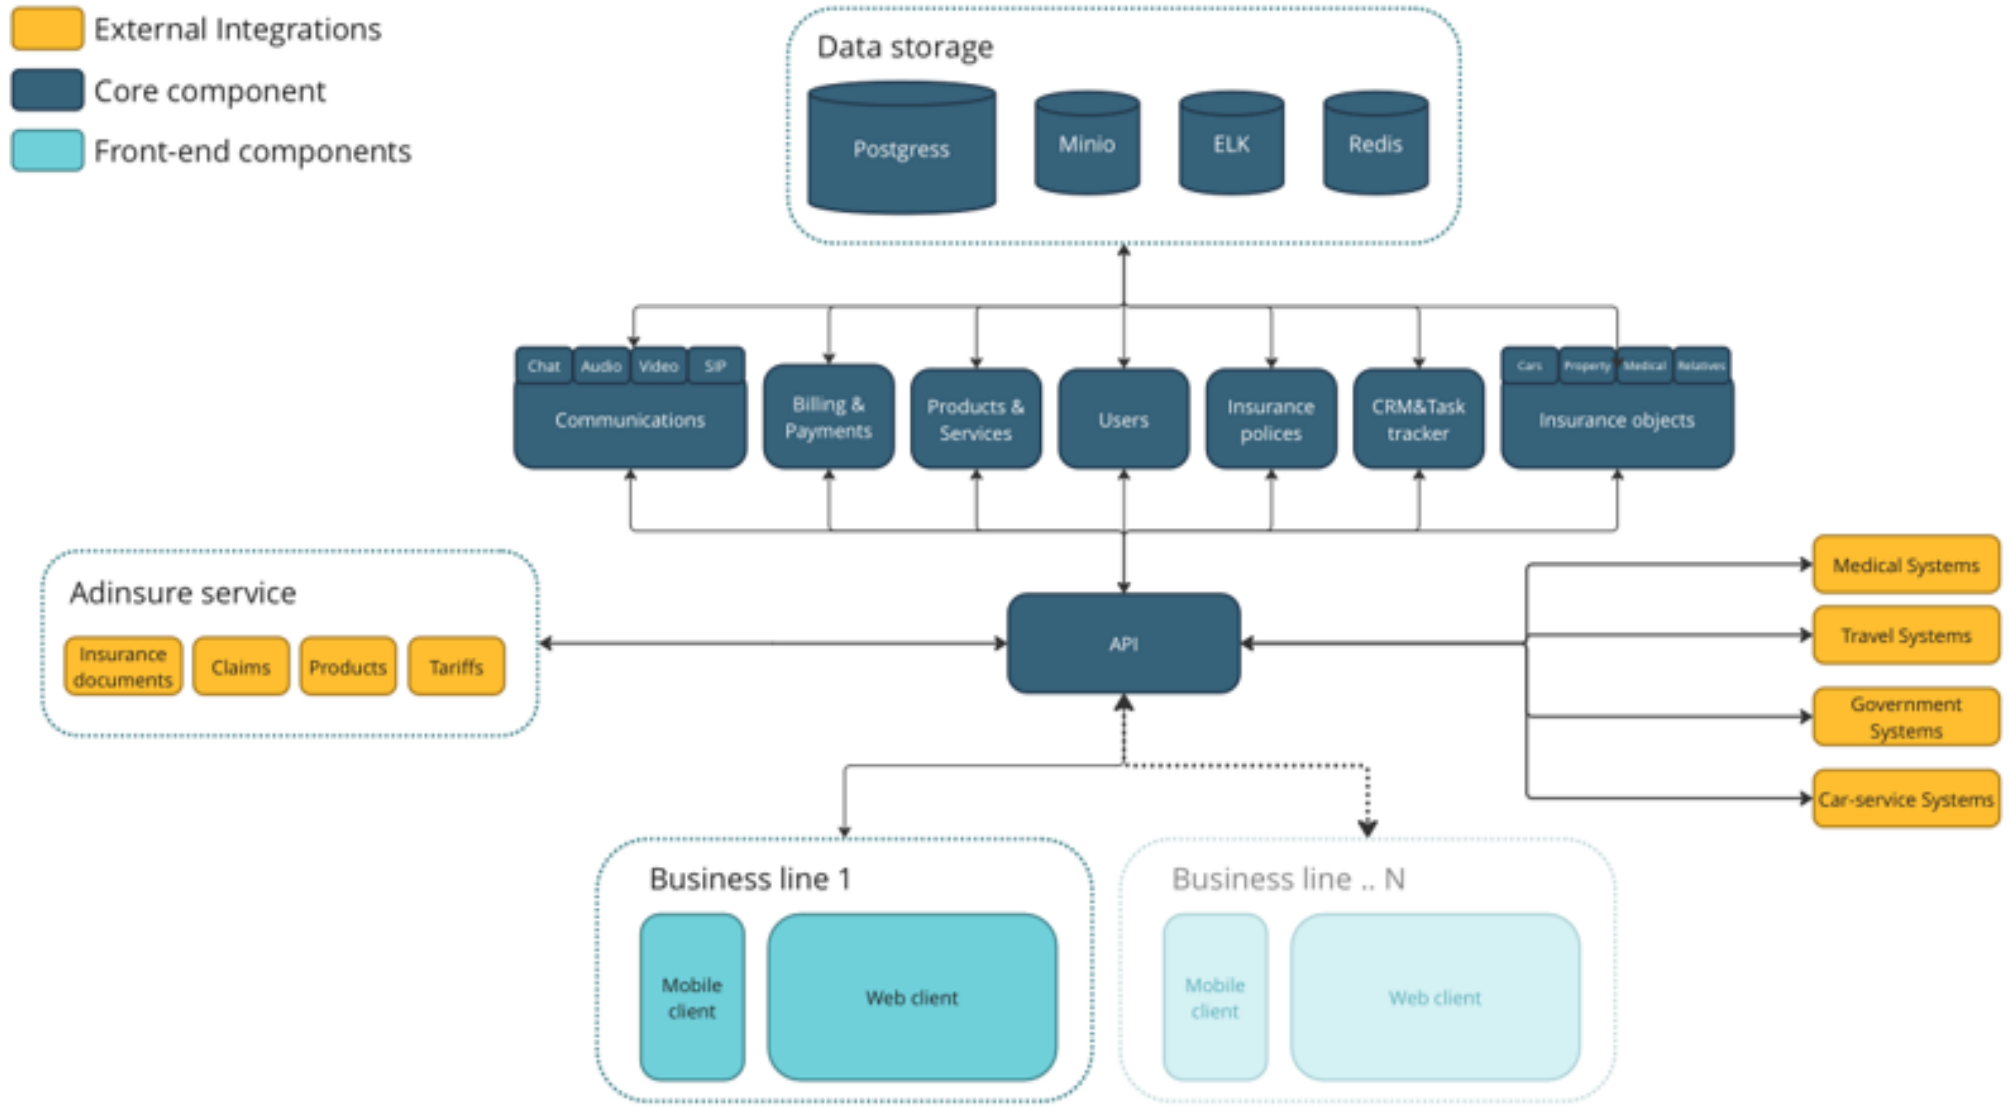

**Apple Pay** 

## 06 Architecture

# EIM Architecture and the technological stack

# Technological stack

- Web Client interfaces
- Admin interfaces

- Android/Huawei
- iOS

- Backend

- Data storages

- Microservice communication

- DevOps Orchestration

# Thank you!
